Colloids and Surfaces, 62 (1992) 352–353
Elsevier Science Publishers B.V., Amsterdam

Contents

(*Abstracted/indexed in: Chemical Abstracts; Current Contents: Physical, Chemical & Earth Sciences; INSPEC; PASCAL/CNRS*)

Vol. 62 Nos. 1/2

Publisher's Note v
The development of a permeability theory applied to concentrated suspensions
J. Azizi, K.S. Alexander, D. Dollimore, A.S. Murthy and S.S. Tata (Toledo, OH, USA) 1
The chemical characterisation of zirconium molybdate gels
P.L. Brown, G.R. Erickson and J.V. Evans (Menai, N.S.W., Australia) 11
Dynamic simulation of floc breakage with a random breakage distribution
J.-P. Hsu and H.-K. Tsao (Taipei, Taiwan) 23
Interfacial properties of mixtures of sorbitan sesquioleate with a block copolymer surfactant at the water/air and water/oil interfaces
M.S. Aston and T.M. Herrington (Reading, UK) and Th.F. Tadros (Bracknell, UK) 31
Maximum disjoining pressure in protein stabilized concentrated oil-in-water emulsions
G. Narsimhan (West Lafayette, IN, USA) 41
Precipitation of nom-ionic surfactants with poly(acrylic) acid and cationic polymers
S. Saito and Y. Matsui (Osaka, Japan) 57
An electrokinetic study of pyrite oxidation
D. Fornasiero, V. Eijt and J. Ralston (Adelaide, S.A., Australia) 63
Polymer–surfactant interactions: (Hydroxypropyl)cellulose with ionic and non-ionic surfactants
C.J. Drummond, S. Albers ad D.N. Furlong (Clayton, Vic., Australia) 75
Dispersion of Si_3N_4 powders: surface chemical interactions in aqueous media
S.G. Malghan (Gaithersburg, MD, USA) 87
Stability of perfluoroalkyl halide emulsions
A.S. Kabalnov, K.N. Makarov and E.D. Shchukin (Moscow, USSR) 101
Surface behaviour of some phenol para-derivatives adsorbed at the free surface of water
P. Dynarowicz and W. Jawień (Krakow, Poland) 105
Adsorption of nonyl phenol propylene oxide–ethylene oxide surfactants on carbon black and the rheology of the resulting dispersions
F. Miano, A. Bailey and P.F. Luckham (London, UK) and Th.F. Tadros (Bracknell, UK) 111
Reversible and irreversible adsorption of particles on homogeneous surfaces
Z. Adamczyk, B. Siwek and M. Zembala (Krakow, Poland) 119
Influence of hydrostatic pressure on interaction of particles and stability of suspensions
V.S. Yushchenko (Moscow, USSR), O. Edholm (Stockholm, Sweden) and E.D. Shchukin (Moscow, USSR) 131
Porosity of silica gels by thermogravimetric analysis
J. Goworek and W. Stefaniak (Lublin, Poland) 135
Influence of geometry on steady dewetting kinetics
R.V. Sedev and J.G. Petrov (Sofia, Bulgaria) 141
An assessment of a rolling-ball viscometer for studying non-Newtonian fluids
B.J. Briscoe, P.F. Luckham and S.R. Ren (London, UK) 153
The adsorption of small particles onto larger particles of opposite charge. Direct electron microscope studies
S. Harley, D.W. Thompson and B. Vincent (Bristol, UK) 163
The control of protein surface concentration on proteoliposomes
S.E. Francis and F.J. Hutchinson (Manchester, UK), I.G. Lyle (Bebington, UK) and M.N. Jones (Manchester, UK) 177
Announcement 185

Vol. 62 No. 3

The influence of alcohols of different alkyl chain length on the solubilization of solutions containing polyoxyethylene *p-tert*-octylphenyl ether
T. Sobisch and R. Wüstneck (Berlin, Germany) 187
Neutron reflection from a liquid/liquid interface
T. Cosgrove, J.S. Phipps and R.M. Richardson (Bristol, UK) 199
"Gradient method" for surface area estimation by benzene vapour adsorption at temperatures below the freezing point
A. Nonaka (Tsukuba, Japan) 207
Immobilized polymeric microspheres: Polyacrolein microspheres covalently bound in a monolayer structure onto glass surfaces
S. Margel, Y. Dolitzky and O. Sivan (Ramat-Gan, Israel) 215
Short-range structure of simulated flocs of particles with bridging polymer
E. Dickinson and S.R. Euston (Leeds, UK) 231
Statistics of emulsion lattices
D.A. Noever (Huntsville, AL, USA) 243
Adsorption of dioctadecyldimethylammonium chloride on silica
K. Esumi, A. Sugimura, T. Yamada and K. Meguro (Tokyo, Japan) 249

Brief Notes

Preparation of platinum particles by thermal decomposition of platinum complex in organic solvent
K. Esumi, O. Sadakane, K. Torigoe and K. Meguro (Tokyo, Japan) 255
Preparation of uniform silica hydrogel particles by SPG filter emulsification method
K. Kandori, K. Kishi and T. Ishikawa (Osaka, Japan) 259

Vol. 62 No. 4

Components of surface free energy of cholesterol in the presence of bile salts
M.L. Kerkeb and F. González-Caballero (Granada, Spain), B. Jańczuk and T. Biatopiotrowicz (Lublin, Poland) 263
A combined calorimetric–thermodynamic study of non-ionic surfactant adsorption from aqueous solutions onto silica surface
J. Narkiewicz-Michałek and W. Rudzinski (Lublin, Poland), E. Keh and S. Partyka (Montpellier, France) 273
The determination of some physical properties of reverse CTAB micelles in 1-hexanol
E. Rodenas and M. Valiente (Madrid, Spain) 289
Computational evaluation of axisymmetric drop shape analysis-profile (ADSA-P)
P. Cheng and A.W. Neumann (Toronto, Ont., Canada) 297
Adsorbed polymer layer thickness determination at the solid–liquid interface by different techniques
B. Siffert and J.F. Li (Mulhouse, France) 307
Study of the transition between different structures of some non-ionic microemulsion systems
A. Xenakis, C.T. Cazianis and A. Malliaris (Athens, Greece) 315
Adsorption dynamics of single and binary surfactants at the air/water interface
C.H. Chang, N.-H.L. Wang and E.I. Franses (West Lafayette, IN, USA) 321
Adsorption kinetics from concentrated micellar solutions of ionic surfactants at the water–air interface
V.B. Fainerman (Donetsk, Ukraine) 333
